# Should I become a Lab Technician !

**Are you asking yourself, If so, you're not alone**

Medical laboratory technicians play a vital role in the effective diagnosis and treatment of patients. You are expected to collect samples and perform diagnostic tests to support doctors and other medical professionals as they detect diseases and treat patients.

The demand for healthcare professionals in India, including medical laboratory technicians, is expected to double by 2030 due to the increasing number of hospitals and the growing population of India.

## Career Benefits in the field of Medical Laboratory Technician ...

- **Strong Demand & Job Security:** The healthcare sector is growing, leading to high demand and job security.
- **Fast Entry:** You can start working in 2–3 years, often with a diploma certification without needing intense entrance exams like NEET.
- **Diverse Work Environments:** You can work in hospitals, private labs, research facilities, or forensic labs.
- **Hands-On Work:** If you enjoy working with technology and analyzing samples (microbiology, biochemistry, hematology), this is a perfect fit.
- **Job security:** There is a critical shortage of medical lab technicians in many parts of the country. Because of this, creates an ample scope to obtain a position in your current area.

## How to become a certified Laboratory Technician ...

- After completing 10+2 studies. in the science stream with subject as physics, chemistry, or biology / math as your focus, a student can choose to pursue **career in Diploma in MLT**.
- A diploma course in **Medical Laboratory Technology** involves **two years of full-time study** (both theory & practical training) and often includes a **three months hands-on internship** on the job training.
- On completion of the course, a student is awarded with authentic '**Certificate of Registration in MLT**' issued by **DMLT/RT council, Govt. of Odisha**- a validation to enhance job prospects and give a competitive edge.
- A student can earn a bachelor's degree in MLT (**B.Sc. MLT**) on lateral entry basis to acquire higher studies and avail widened career scope.
